# MANAGED DEVICES SERVICES

YOUR DEVICE INVESTMENT SHOULD BE GROWING YOUR PRODUCTIVITY – NOT YOUR TO-DO LIST

Today's fast-paced business environment requires technology to have greater agility while maintaining performance than ever expected of previous systems. Employees that thrive in today's environment rely on an array of modern computing devices, not just their workstation that remains within your corporate firewall.

HOW MONTRA CAN HELP

Montra's Managed Devices program was designed to alleviate the burden associated with the management and maintenance of all the devices that your business relies on. We will keep all devices up to date with the latest technology versions, ensuring that you avoid any security risks or compliance violations. Through this support, we bring predictability to device management so you can focus on driving business innovation. Our devices program aims to support and maintain:

- Any Network-Connected End User Device
- Servers
- Power Devices
- Server Processors
- Network Components

# GAIN FULL VISIBILITY INTO YOUR COMPLIANCE STATUS

Montra's Managed Devices Services allows you to embrace the efficiencies of added devices on your network while minimizing the risk and liability. While our experts manage your systems, you know that your devices are running the latest technology versions and security patches. You can access any of this data through our single-pane management interface VIA.

VIA provides you with instant access to information about any system, change management, or user in your environment. With VIA, you can be sure that your partnership with Montra will allow you to minimize operational complexity, maximize your IT investments, and experience a significant and measurable reduction in risk.

SERVICES INTEGRATED INTO YOUR EXISTING OPERATIONS

Montra designs all of our service offerings to integrate seamlessly within your operations for minimal disruptions to your day-to-day business.
