

# SIEM AS-A-SERVICE

## IMPROVE YOUR PROTECTION AGAINST SECURITY BREACHES

Cyber threats continue to advance and become more persistent and the need for 24/7 threat monitoring is critical. But the cost and manpower needed to do that level of monitoring in-house can be prohibitive for many organizations. With Montra's SIEM-as-a-Service solution, you don't have to do this alone. Whether our security experts co-manage your existing SIEM or build a hybrid SIEM arrangement, you are better able to leverage your organization's investment and improve your security posture.

There is an average of **49.6 days** between a data breach being discovered and reported

- *Vigilan Security*

### HOW MONTRA HELPS

A managed SIEM solution takes away all headaches and ensures a company gets the full value from their SIEM investment. When you trust your SIEM solution to Montra, our security experts will keep a watchful eye on all data points, look for suspicious activity, provide quick visibility and deliver fast responses to ensure timely alerts to any security anomalies. Additionally, Our cybersecurity experts will tune your SIEM, adding correlation rules and building hundreds of use cases to improve your SIEM's performance and help you get more value and use out of your current cybersecurity posture.

By monitoring network traffic and threat points, Montra's SIEM-as-a-Service offering provides you with all the services expected with your SIEM device investment at a fraction of the cost of bringing resources in house to manage your security posture. These services include:

- SIEM and Log Management
- Threat Intelligence
- Intrusion Detection
- Compliance Management

## COMPLETE MANAGEMENT OF YOUR SIEM APPLICATION

A properly managed SIEM solution is the protection your business needs to aggregate relevant data from multiple sources or intrusion points, identify deviations from the norm and take appropriate action. When you rely on Montra's SIEM-as-a-Service solution, you get the security you need, in addition to:

**Predictable  
Pricing**

**24x7x365  
Incident Response**

**Proactive  
Remediation**

**Comprehensive Threat  
Detection**

**Audit-Ready  
Reporting**

# GAIN FULL VISIBILITY INTO YOUR SIEM PERFORMANCE

Montra's SIEM-as-a-Service offering leverages VIA, our data visualization tool that uses highly automated data and security orchestration provides your company with insight into security-related incidents and events, which could indicate malicious activity. It monitors and analyzes all of your device's logging data, including workstations, servers, routers, firewalls, switches, IDS/IPS and any other devices that generate data.

VIA then aggregates this data into one place and analyzed to generate alerts for potential indicators of compromise, enable threat intelligence and incite a response, if necessary. The powerful reporting features also allows companies to prepare reports required in all regulated industries.

## SERVICES INTEGRATED INTO YOUR EXISTING OPERATIONS

A SIEM solution is an incredible, and necessary, tool that's used to keep your organization secure and protected from cyber threats. A SIEM can't operate in a silo though. It needs constant tuning, maintenance and monitoring in order for it to work effectively. Montra's SIEM-as-a-Service solution ensures that your SIEM is properly configured and tuned to incorporate any security weaknesses throughout your network.

## ABOUT MONTRA SOLUTIONS

Montra Solutions is a software-enabled managed services provider specializing in Cloud, Security, Devices, and Infrastructure solutions. Headquartered in Atlanta, Montra simplifies the management of increasingly complex IT operations with software that better integrates and automates the monitoring and management of modern IT. Montra's innovations are enabling scalability and consolidation for the highly fragmented, multi-billion-dollar managed services industry.
