⋈ MONTRA®

LOGISTICS MANAGEMENT

MOVE YOUR DEVICES EVERYWHERE

In today's work environment, company devices can be deployed in the office, at an employee's home or in a remote location. Every device introduces new variables and complexity to your IT management.

Montra can help make the most of your expanding device ecosystem. Montra's software has the logistics capabilities to handle your growing fleet of devices.

Our Platform helps you procure, configure, warehouse, and ship all the devices required to keep your modern operation running.

AT A GLANCE

- **Deploy Devices Faster**

- **Process Returns & Repairs Faster**

- **Track Assets & License Usage**

- **Lower Total Cost of Service**

- **Minimize Service Downtime**

Companies on average have 2.3 connected devices per employee.
- Forrester Research

LOGISTICS

EFFICIENCY

With accurate and usable data ablout your devices, you can better manage them. Know what is in storage, what the warranty status is, where field devices are, and be able to move them and fix them easily when needed.
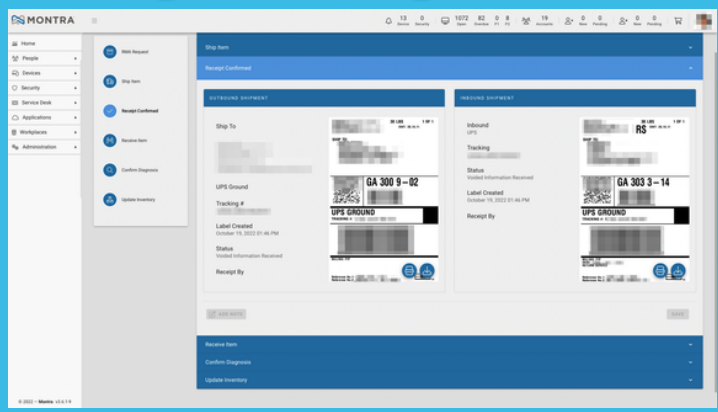

INTEGRATION

Connect with the systems you already use and ehance the data and processes you have rather than replace them. From your own service system, you can initiate orders from inventory or repairs to field systems. Montra will track orders, repairs and installs throughout your operation.

VISIBILITY

See all of your devices and where they are in the deployment process from the warehouse to the field. Have the confidence of knowing your most important assets are where they need to be. Know that you can report status to finance and operations will confidence.
