SECURITY AND COMPLIANCE

SECURITY AND COMPLIANCE MANAGEMENT FOR MODERN IT

The need to protect against information security threats has never been greater. Security challenges are growing – including increasing ransomware attacks, the dissolving corporate perimeter, and extensive regulatory requirements. These are now compounded by hybrid work trends, device proliferation at the edge, and increased use of cloud and SaaS services.

At Montra, we offer a full suite of managed security solutions that protect you from everything from loss of data to the latest malware attack. Our experts can provide everything from the initial design, deployment, and configuration, to ongoing management, monitoring, and reporting for continuous, up-to-the-minute protection.

Our experts build and manage an integrated, consistent, and layered security approach centered around a holistic, connected security model that considers both the threats outside the enterprise and the dangers of data loss from within to provide you with the most reliable protection of your digital property.
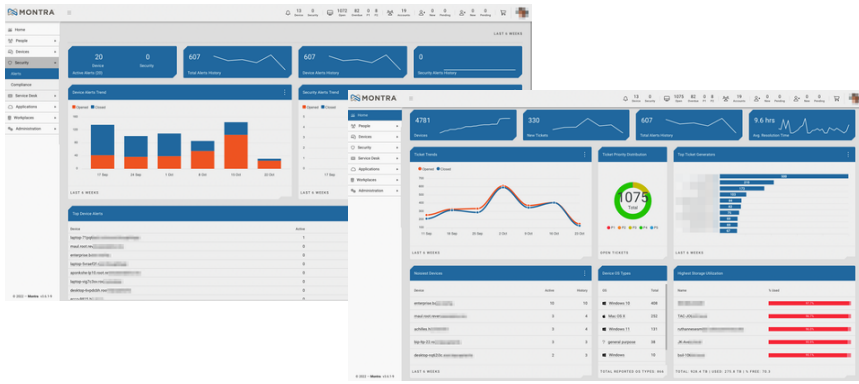

AT A GLANCE

- **Get Enterprise-grade Security Without the Complexity**

- **Keep Your Systems Secured from Ransomware**

- **Minimize Data Loss from Employees**

- **Stay Compliant with Industry Regulations**

The average cost of a data breach in the US is $8.19M

Automate the Assessment Process

> **Over 100 million Americans have had their personally identifiable information (PII) compromised.**

## GAIN FULL VISIBILITY INTO YOUR SECURITY STATUS

Montra's Security and Compliance offerings are delivered through the Montra Platform, which aggregates real-time security, availability and compliance information, to provide you with a single view of your entire IT operation. With 24/7 monitoring and real-time alerting, we will see anomalous events in your environment that could result in a data breach or compliance violation. The Montra Platform integrates with the other systems and services in your organization allowing your to view and control the systems and processes that are critical to keeping your business running.

NEXT GENERATION COMPLIANCE MANAGEMENT

Montra's approach to compliance management helps businesses properly address the cybersecurity and compliance requirements of all related IT regulations. Our security experts partner with you to identify your risks and vulnerabilities, audit your systems and processes, and develop a remediation plan to improve your security posture over time. Our areas of coverage include:

Data Security/Privacy — Scan, Plan, Document, Implement

Compliance standards: NIST, ISO 27001 27017, AICPA SOC, CIS, PCI, CMMC (Cybersecurity Maturity Model), HIPAA, GDPR, FINra

Continuous Availability Monitoring — Monitor, Alert, Remediate

Manage the expanse of privacy policies correctly	Document your compliance to ease critical audits	Stay in compliance over time with ongoing monitoring
