

WORKFORCE MANAGEMENT

KEEP YOUR PEOPLE PRODUCTIVE, PROTECTED, AND PREPARED FOR CHANGE

The average tenure of employees is shrinking but the demands on them are constantly increasing. Productivity, protection, and flexibility are the key things that matter to your employees. Montra helps keep employees secure and productive – whether in the office, working remotely, or on the road.

With integrations into HR systems, identity management systems, and all the applications in your organization, Montra helps you manage workforce access and security across all the services you management for them.

PRODUCTIVITY

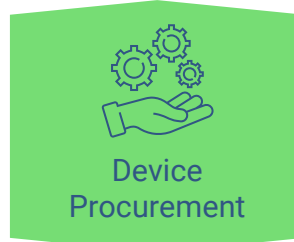

From their first day on the job until their last, Montra helps IT ensure every employee has the information, resources, and tools they need to be effective. Montra automates IT onboarding directly from the HRIS making certain your people have the devices and access they need as soon as possible.

PROTECTION

Your privacy and security of your workforce data is critical. Montra enables secure processes that eliminate the need for email and other risky ways to share employee information. Montra also ensures the company's data is kept safe, when workforce members leave by automating the removal of application and device access.

FLEXIBILITY

In today's market, your people are looking for flexibility in how they do their work. Supporting this creates complexity for IT. Montra enables you to support workforce flexibility while still maintaining the reliability and security your business needs.
